Chennai ,Tamil Nadu | 8248189032 | [sahanashreee26@gmail.com](mailto:sahanashreee26@gmail.com) | [Portfolio](#) | [Linkedin](#)

## PROFESSIONAL SUMMARY

---

Detail-oriented Information Technology student with an **8.6 CGPA** and hands-on experience in **Python software development**, **Object-Oriented Programming (OOP)** and **machine learning**. Proven ability to bridge the gap between backend logic and user experience while managing cross-functional projects. Strong communicator skilled in product advocacy, technical documentation and writing clean, maintainable code.

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, PHP, HTML5, CSS3.

**Frameworks & Libraries:** React, Next.js, Flask, Tailwind CSS.

**Software Engineering:** Object-Oriented Programming (OOP), REST API Development, CRUD Functionality, DSA.

**Tools & Platforms:** Git, GitHub, MySQL, Streamlit, Figma, Google Search Console, Vercel, Docker.

**Soft Skills:** Technical Outreach, Student Engagement, Conflict Resolution, Cross-functional Communication.

## TECHNICAL PROJECTS

---

### AI-Based Fraud Detection System | Developer

- Constructed a real-time predictive model using **Random Forest** and **Streamlit** to identify fraudulent transaction.
- Programmed a "Smart Freeze" security protocol to automate risk mitigation and trigger instant alerts.
- Performed advanced feature engineering on large datasets to optimize model precision and recall.

### Employee Management System | Full-Stack Developer

- Architected and Implemented a full-stack web application leveraging **Python**, **Flask**, and **MySQL**.
- Structured protected **REST APIs** to handle backend logic and designed frontend using HTML, CSS, and JavaScript to ensure seamless user experiences.

### AI Spend Optimization Dashboard | Frontend-Focused Full Stack Developer | [Link](#)

- Built and deployed a SaaS-style AI spend optimization dashboard using **Next.js**, **React**, **TypeScript** and **Tailwind CSS** to analyze AI tool subscription costs and generate dynamic savings recommendations.
- Created reusable frontend components, interactive analytics visualizations, downloadable audit reports and responsive UI systems, deployed the application on Vercel with GitHub-based CI workflow.

## PROFESSIONAL EXPERIENCE

---

### Community Manager Intern | Velocity Global Solutions Private Ltd.

April 2026

- Executed targeted communication strategies to educate **300+ users** on product utility, streamlining feedback and driving a **15% increase in conversion rates** for digital tools.
- Led an end-to-end **SEO strategy**, utilizing Google Search Console and backlinks to successfully drive target web assets to Page 1 of Google Search.

### DevOps Intern | Bics Global

July 2025 – August 2025

- Orchestrated **containerization strategies using Docker**, reducing environment setup time by **40%** and accelerating deployment cycles.
- Optimized version control workflows and repository management using Git, reducing integration conflicts by **25%** to enhance team collaboration efficiency.

### UI/UX Developer Intern | RootPro Technologies

December 2025-January 2026

- Architected the responsive Evans School website using Figma and Tailwind CSS, boosting user engagement by **25%**.
- Engineered custom user interfaces integrated with PHP backend systems, accelerating dynamic content delivery speeds by **20%**.

## EDUCATION & CERTIFICATIONS

---

**Bachelor of Technology (IT)** | Jeppiaar Engineering College | **CGPA: 8.6**

**Certification:** Python for Data Science – NPTEL (2025)
