

Technoverse Hackathon 2026

Shaping tomorrow's
tech leaders, today!

About Technoverse

Technoverse Hackathon 2026 is Cognizant® national-level innovation platform, designed exclusively for 2027 engineering graduates across India. Evolving from a regional initiative into a countrywide stage, Technoverse brings together aspiring innovators to collaborate, experiment, and build smart solutions powered by Generative AI and modern engineering practices.

Participants will have the opportunity to apply their academic expertise in solving real-world challenges through themes and technology stacks curated by Cognizant. With a strong commitment to diversity and inclusion, Technoverse proudly promotes 50% women participation, ensuring diverse perspectives and richer innovation outcomes.

Registration guidelines

- Registrations are exclusive to selected partnered colleges.
- All students graduating in 2027 with full-time B.E/B. Tech/M.E/M. Tech degrees are eligible to apply.
- Each college can register with a maximum of eight teams with 4 members each.
- Each team should have at least 50% women participation.
- Attending design thinking awareness session is mandatory post registration.
- Choose a theme from the industry domains provided by Cognizant.
- Develop the MVP using Cognizant recommended technologies in an AWS environment provided by Cognizant.
- Team composition cannot be altered once the registration is completed.
- A participant is permitted to join only one team for the entire duration of the hackathon.
- Each team must have a unique name.
- Participants must register using only their Superset-registered email IDs. The team owner must ensure that all invited members are also registered with Superset in order to form a team.

Program journey and timeline

Rewards and recognition

In-person felicitation

Winners

All teams in
final round

Attractive prizes worth
₹ 5 lakhs,
Cognizant internship
opportunities

Cognizant
merchandise and
goodies

Certificates

High level themes across industry domains

Communication, Media & Technology

- Network Automation
- GenAI for Content Creation
- 5G Monetisation
- Churn Prediction & Retention
- Privacy-First Advertising

Banking

- Lending & Credit
- Fraud Detection
- Personalised Banking
- Open Banking & APIs
- Payments Modernisation

Manufacturing

- Industrial Edge AI
- Digital Twin
- Automated Quality Inspection
- Predictive Maintenance
- Sustainable Manufacturing

Utilities & Energy

- Grid Modernisation
- Predictive Asset Maintenance
- Carbon Accounting & Reporting
- AI-Driven Energy Trading
- Demand Response

Healthcare

- Prior Authorisation Automation
- Clinical Documentation
- Interoperability
- Readmission Prevention
- Value-Based Care Analytics

Insurance

- Underwriting Automation
- End-to-End Claims Automation
- Usage-Based Insurance
- Embedded Insurance
- Catastrophe Risk Modelling

Retail

- Unified Commerce
- AI-Driven Merchandising
- Hyper-Personalisation
- Supply Chain Resilience
- Smart Store Operations

Lifesciences

- Drug Discovery
- Decentralised Clinical Trials
- Pharmacovigilance
- Digital Biomarkers
- Regulatory Intelligence

Technology stack and guidelines

- 1 Select one of the high-level business themes provided by Cognizant to define the problem.
- 2 The idea submission and agent builder challenge are conducted through the platform.
- 3 Submit your idea using the designated format on the platform.
- 4 The agent building challenge will be based on the submitted idea.
- 5 Develop the MVP using the following technology stacks:

Programming Languages:

- Python, Java, JavaScript

Frameworks and Platforms:

- Frontend: React, Angular, Vue for web UI.
- Backend / APIs: Spring Boot, FastAPI, Node.js
- Databases: MongoDB
- AI / ML: LangChain, LangGraph and AWS Strand.

Application Types:

- Web apps, REST APIs , Containerized services.

Idea submission - structure

Why

Explain the problem

Clinicians spend 30–50% of their time on documentation, often requiring 2 hours of paperwork per 1 hour of care. This heavy administrative load leads to burnout and increases errors. As a result, patient interaction time decreases and hospital costs rise.

Problem description and business scenario

Clinicians handle 20–40 daily consultations, leading to heavy documentation backlogs and burnout. Rising healthcare costs drive a shift toward AI solutions. Our AI co-pilot automates structured notes, reducing documentation time and improving efficiency in high-volume care.

Problem scope

The project automates clinical note generation without performing diagnosis. It supports doctors and nurses while helping administrators improve billing accuracy. Outputs are secure, auditable, and compliant with healthcare privacy standards.

Problem scope: Target users/ Stakeholders

Primary users like doctors, nurses aiming to reduce documentation workload. Secondary stakeholders like administrators focused on accuracy and compliance. The solution automates clinical notes only, ensuring secure and privacy-compliant outputs.

Idea submission - structure

How

Approach to solve the problem

Solution overview

Our AI "co-pilot" captures doctor-patient consultations to automatically generate structured SOAP notes and FHIR-compatible JSON. It features a clean dashboard for live transcription and note editing, ensuring doctors remain in control of the final output.

Technical details

The system is built with React and FastAPI, utilizing LangChain and the AWS Strand Agent Framework for multi-agent orchestration. It uses MongoDB for storage and integrates with existing EHR systems via secure REST APIs.

Innovation

The solution uses a unique multi-agent architecture (Input, Reasoning, Compliance, and Output agents) that provides higher accuracy and explainability than a single LLM. This "agentic" approach is specifically designed to handle complex medical context and privacy requirements.

Market potential

With India's medical costs projected to rise by 11.5% in 2026, there is a massive demand for ambient clinical intelligence. Research shows these tools can reduce documentation time by up to 79%, offering a scalable solution for high-volume Indian clinics.

What

Value proposition

The tool delivers a 45-70% reduction in charting time, directly eliminating "pajama time" and physician burnout. It improves the patient experience through better eye contact and provides hospitals with faster billing cycles and scalable, multi-language support.

Idea evaluation criteria

Will the idea deliver
business value?

Is the idea
unique?

Is the idea
implementable?

Is the idea
scalable?

Disclaimer:

- In case of any queries related to hiring, interview schedules, or offer communication, kindly reach out to us at Campus2Cognizant.
- Cognizant does not entertain payments of any kind from candidates or vendors for employment. Requests for such payments should be promptly reported to GenCHRComplianceIND@cognizant.com.
- If you encounter anyone who claims to offer jobs at Cognizant in return for any benefit (monetary or non-monetary), please do not entertain them. Please be informed that Cognizant shall not be held responsible for any such instances or payments you make.
- We recommend that you do not respond to spam emails/ messages you do not trust; never disclose your personal or financial details to anyone you do not know. If any such mails purporting to come from Cognizant are received, we advise you to contact us at GenCHRComplianceIND@cognizant.com.
- Cognizant takes its hiring practices seriously and appreciates you keeping the Company informed of any individuals posing as Cognizant employees who make false job offers using Cognizant's name. We remind you that while recruiting employees, Cognizant will only communicate with you through authentic Cognizant email addresses and Cognizant will never extend any job offers to anyone based on an online application without first conducting an in-person, video, or telephone interview through verified encrypted channels. If any such mails purporting to come from Cognizant are received, we advise you to contact us at GenCHRComplianceIND@cognizant.com.
- To ascertain that you are receiving a genuine call from Cognizant, please ensure to collect the recruiter's details (full name; official email id, employee ID & mobile number) during the call.
